PROFESSIONAL SUMMARY

Computer Science undergraduate with strong problem-solving skills and hands-on experience in full-stack web development using MERN stack technologies. Skilled in Data Structures & Algorithms in Java, object-oriented programming, and building scalable applications with a focus on performance and clean architecture. Familiar with Python fundamentals, SQL, data handling, and dashboard-oriented applications. Knowledge of DevOps basics including Git, Docker, and Linux. Passionate about building efficient tools, automation systems, and analytics-driven solutions aligned with business needs.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL, HTML, CSS
 - **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOPs), DBMS, Software Design Patterns, Recursion, Graphs, Trees, Hashing
 - **Frameworks & Libraries:** React.js, Node.js, Express.js
 - **Databases:** MySQL, MongoDB
 - **Tools & Technologies:** Git, GitHub, Linux, Docker, VS Code
 - **APIs & Cloud:** REST API Development & Integration, Basic Cloud Concepts
 - **Analytical & Problem Solving:** Strong Logical Thinking, Debugging, Testing
 - **Additional Skills:** Responsive UI Design, Data Handling, Data Validation, Dashboard Development • **Soft Skills:** Communication Skills, Analytical Thinking
-

PROJECTS-

Job Tracker Web Application:

React.js, Tailwind CSS, JavaScript

- Built a responsive job tracking platform to manage application workflows efficiently.

- Developed reusable React components to improve maintainability and scalability.
- Designed recruiter-friendly dashboards and clean UI for seamless user experience.
- Structured the project for future backend integration using Node.js and Express.js.
- Focused on performance optimization and organized state management.

Full-Stack MERN Practice Projects: React, Node.js, Express.js, MongoDB

- Developed multiple full-stack applications with REST API integration.
- Built backend services using Express.js for CRUD operations and data persistence.
- Integrated MongoDB for structured data management.
- Applied responsive frontend development using Tailwind CSS.
- Practiced modular architecture and reusable code structure.

TECHNICAL COMPETENCIES

- Strong understanding of Data Structures & Algorithms in Java.
- Solved coding problems involving Arrays, Strings, Trees, Graphs, Linked Lists, Dynamic Programming, Recursion, and HashMaps.
- Familiar with software development lifecycle and testing practices.
- Knowledge of object-oriented design and scalable code architecture.
- Exposure to automation mindset and performance-focused development.
- Basic understanding of AI/LLM concepts and API-based integration workflows..

EDUCATION GLA University

Bachelor of Technology in Computer Science Engineering

Expected Graduation: June 2027

CPI: 7.27

Mathura, India

Tundla Public Senior Secondary School

Class XII (CBSE)

Completed: 2023

Firozabad, India

ACHIEVEMENTS & ACTIVITIES

- Participated in hackathons including WebX and Technavya 2.0.
- Completed DevOps training covering Git workflows, Linux CLI, Docker, and CI/CD basics.
